DETAILED ACTION

Election/Restrictions

Newly submitted claims 32-37; 39-45; 47-63 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 32-37 depend from nonelected claim 11; claims 39-45 and 47-53 constitute a separate species from that of elected claim 1, they do not require a p-type impurity region which monotonically decreases.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 32-37, 39-45; 47-63 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 6-7, 12-16, 38, and 46 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant's amended claim language recites, "introducing ion of a r-type impurity into at least a portion of only the first semiconductor island *without mass*

separation wherein the portion is to become a channel region of a thin film transistor” however, there is no disclosure within the specification of how Applicant’s method prevents mass separation. In fact, the terms mass separation are not located within the specification and therefore Applicant’s amended claim language is not properly enabled by the specification.

Response to Arguments

Applicant’s arguments filed 11/22/02 have been considered however are deemed to be unpersuasive. Applicant argues that the Examiner’s non-final rejection made in Paper No.5 is overcome by his amended claim language because Yamazaki (‘563) fails to teach Applicant’s amended claim limitation “without mass separation”. However this is unpersuasive because Applicant lacks sufficient enablement for his amended clause.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,
